

February 24, 2017

Dear Hiring Manager,

I was delighted to see an internship opening at Upstart and hope to get selected for the interview. I am a first-year student pursuing a Masters Degree in Computer Software Engineering at San Jose State University. I have 3.5 years of work experience at Accenture PLC as a Software Developer having worked extensively on Web Development for fortune 500 clients. During my experience at Accenture, I worked extensively on UI development using AngularJS, Javascript and jQuery and became interested in Computer Graphics technologies that made these possible. It is for these reasons that I enrolled in Masters Degree so that I can learn the magic that makes the wonders on the screen possible.

I worked with high volume clients, building SharePoint Web Parts, user interfaces, Timer Jobs and other SharePoint artifacts within the Service Level Target Time. I also developed scripts that ran on the production servers. I have demonstrated my ability to resolve a variety of issues and high priority incidents during hyper care phase after a Go-Live of a SharePoint Application and earned many accolades for this. After this valuable experience, I am now pursuing a Masters Degree in Computer Software Engineering to further my technical skills in the rapidly evolving field of Computer Science so that I may realize my potential and grow into bigger roles. Through the vigorous curriculum at the University, I have become highly skilled in Data Structure and Algorithms and have developed a high degree of proficiency in C++. I am now looking for internship opportunities.

Thank you for your consideration, and I look forward to hearing from you.

Sincerely,

Huzaifa Aejaaz
